**3 shots of PedvaxHIB are equivalent to 4 Hib doses. 4 doses are required if a child receives more than one brand of Hib shots.

***PPSV23 or Pneumovax is a different vaccine than Pprevnar 13 and may be seen in high risk children over age 2. These children would also have received Pprevnar 13.

Note: Children beyond their 5th birthday are not required to receive Hib or PCV vaccines.

Gray shaded boxes above indicate that the child should not have received any more doses of that vaccine.
